| Date | 15 October 2022 |
| Team ID | PNT2022TMID27734 |
| Project Name | Project – Machine Learning by Vehicle Performance Analyser |
| Maximum Marks | 4 Marks |

Solution Architecture:

- solutions architecture is another relatively new discipline that is playing an increasingly critical role in the full end-to-end ML life cycle as ML projects become increasingly complex in terms of business impact, science sophistication, and the technology landscape
- We will discuss the different steps it will take to get an ML project from the ideas stage to production and the challenges faced by organizations when implementing an ML initiative.
